

NORDFLOW FLOWPACK FILMS

Modern, high speed flowpack machines (both horizontal and vertical) demand the utmost from packaging films.

The markets are demanding downgauged and recycleble packaging materials to reduce the pressure on the environment and on the other hand, reductions of costs. In close cooperation with our R&D department and our raw materials suppliers we work continuously on new film structures so we can guarantee processability and continuity of our packaging films on all flowpack machines.

Area's of use:

Meat (sliced)

Cheese (sliced)

Bread

Fish

Vegetables

Cheese

Pancakes

STRUCTURES

BASE MATERIALS

- PET
- OPA
- OPP
- OPE
- PET/ALOX
- PET/SIOX
- PET/METALIZED

LAMINATE OPTIONS

- PE/EVOH/PE
- PE/PA/EVOH/PA/PE
- PP/EVOH/PP
- PE
- PP
- CPP

Alternative (recyclable) structures can be customized.

PROPERTIES

- High barrier
- Recycle ready
- Thickness from 20 to 100 my
- Asymmetric structures possible
- UV absorbance on request
- High puncture resistance possible

- Excellent haze
- Easypeel
- Front and/or reverse print
- Printable up to 11 colours
- Thickness reduction when possible
